

**Technical Requirement for Environmental Products**  
**The Certificable Technical Requirement for Environmental Labelling Products**  
**Products Made from Recycled Plastics** **HJBZ 44-2000**

---

## **1 Scope**

This technical requirement specifies the basic requirements, technical contents and test method of environmental labelling for Products Made from Recycled plastics.

This technical requirement shall apply to various products made from recycled plastics which use plastic waste as primary raw material.

## **2 Basic requirements**

2.1 Quality of products shall conform with requirement of relevant product quality standard.

2.2 Pollutant emission of the company should be obliged to conform with pollutant emission standards nationally or locally.

## **3 Definition**

"Products made from recycled plastics" refer to plastic products such as constructional material made from plastic waste (for example, steel products, hedge and wallboard), gardening materials (for example, flowerpot, garden stake), farm product container (for example, containers for eggs, fruits and vegetable), office supplies (for example, file folder and envelope), container for non-foodstuff and reusable packing box, recreation facility and outdoor furniture.

## **4 Technical contents**

4.1 The products must declare that they should not be used for food packaging.

4.2 Content of plastic waste in products should not be less than 80% (by weight).

## **5 Test**

5.1 Technical contents in 4.1 shall be proved by the way of checking instruction of the products on site inspection.

5.2 The technical contents in 4.2 shall be proved through field inspection.

---

## **Annotations:**

This technical requirement has been prepared by Department of science and technology, standards of State Environment Protection Administration.

The State Environment Protection Administration keeps the right of interpretation for this technical requirement.
